Too Fat, Too Thin?

Epilepsies

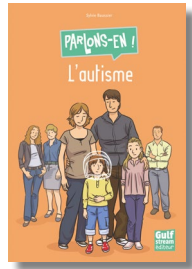

Alzheimer

Addictions

Too Many Antibiotics?

Autism

Themes :
differences,
society, health,
glycemia.

• In order to understand a disconcerting disease or a handicap better, let's talk about it!

Mary, Tom, Louise, Zora and Maxim have passions, dreams... But their daily life and future are linked to a particularity: they are diabetic – or someone in their circle is. What is happening to them? What is happening in their body? Can they participate to activities such as sport? Go out with their friends? Through their stories, you will discover what it means to be diabetic nowadays and you will learn to know the difference between the truth and commonplaces. A book full of life, turned to the future, reminding us that when diabetes is well taken care of, diabetic people can live like the others, with the others.

AUTHOR AND ILLUSTRATOR

Sylvie BAUSSIER was a librarian, then an editor of encyclopedias, before becoming a writer of books for children. She writes above all historical fictions and documentaries.

Aurélien BOUDAULT is a French illustrator. He works for publishers, for the press and also for advertising agencies.
